General Information

Congratulations. You have purchased a fine instrument with many technological advances. In order to obtain the most enjoyment from your music system, locate the operating instructions for your radio in this booklet, and become familiar with all of its specific features.

Turning Radio "On"

For power to reach the radio, the ignition switch must be in either "ACCESSORY" or "ON" position, and radio turned on.

Power Antenna Care

To Clean (before lubricating) Mast:

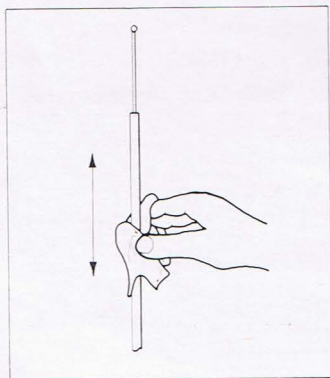

1. Raise antenna to full height.
2. Dampen clean cloth with mineral spirits.
3. Wipe cloth over mast sections, removing any dirt.
4. Retract and extend antenna.
5. Repeat steps 1 thru 4 at least two more times.

To Lubricate (after cleaning) Mast:

1. Raise antenna to full height.
2. Dampen clean cloth with light oil—GM9981712 or light sewing machine oil

Note: Do not use silicone type oils.

3. Wipe cloth over antenna, evenly distributing oil.

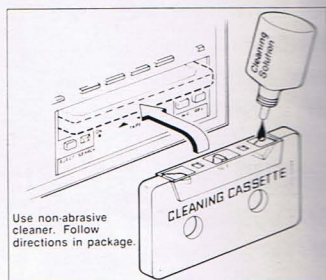

Antenna Mast Cleaning/Lubricating

4. Retract and extend antenna.
5. Repeat steps 1 thru 4 at least two more times.

Tape and Tape Player Care

Optimum performance can be maintained by cleaning the internal tape head, capstan, and pinch roller periodically (approx. each 100 hours of operation). This can be done by inserting a nonabrasive cleaning cassette in place of the music tape.

Store cassettes away from extreme heat or direct sunlight. Protect the open ends from dirt or damage; store them in their original cases or other protective cases.

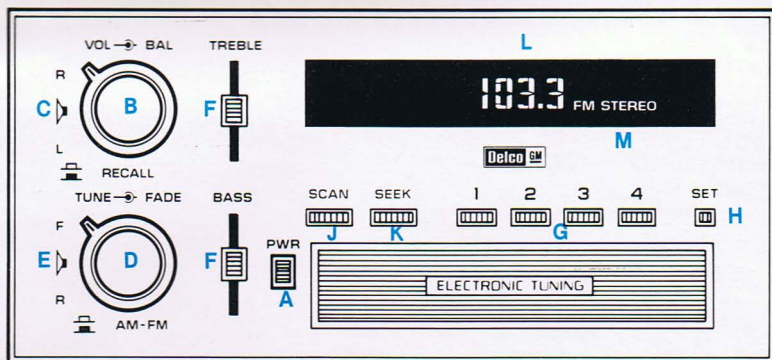

For best results, 120 minute tapes are not recommended.

When leaving the car, cassettes may be left in the tape player if the deck is the "auto reverse" type (tapes are either automatically ejected or internally protected). In other models, tapes should be removed to prevent possible damage to the tape or tape player.

Your Warranty

Electronically tuned radios use reliable solid state components. They should provide long-life performance. The units are covered under the General Motors warranty policy. (See your automobile warranty statement.) If a problem should occur, return the car to your dealer.

To Operate the Radio:

- A. Power Button ("Pwr")**—Press to turn radio on. Press again to turn radio off.
- B. Upper Knob**—Rotate to control volume.
- C. Balance Control** (located behind upper knob)—Turn to adjust left/right speaker balance.
- D. Lower Knob**—Rotate to manually tune radio stations. Frequency will be displayed during tuning.
Press to alternately select AM or FM band.
- E. Front/Rear Speaker Control** (located behind lower knob)—Rotate to adjust the sound between the front and rear speakers.
- F. Bass and Treble Controls**—Slide treble control up to increase treble, or down to decrease treble. Slide bass control up to increase bass, or down to decrease bass.
- G. Pushbuttons**—The radio has four pushbuttons you can use to easily select your favorite stations. You may select four AM and four FM stations for a total of eight selections.

To set pushbuttons:

1. Make sure the bandswitch (D) is on the band you want. Then, tune in the desired station.

2. Press SET button. (The Set indicator light on the frequency display will then light up.) Then, press one of the four station pushbuttons. (The Set indicator light will then go out.)

The radio will then tune to the selected station whenever you press the station button.

J. & K. Scan & Seek

Use the Scan and Seek buttons for automatic station tuning.

- J. Scan Button**—Press to automatically sample each station being received. To stop Scan, press Scan button again.

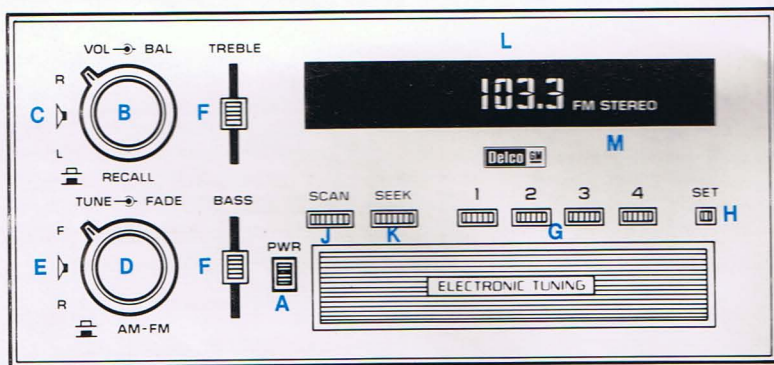

Note: The Scan indicator on the frequency dial will light up during Scan operation.

- K. Seek Button**—Press to automatically locate and retain the next listenable station on the band.

L. Station Frequency Display

- M. FM Stereo Indicator**—Lights up whenever an FM station is broadcasting in stereo.

WITH  button

To Operate the Radio:

A. Power Button ("Pwr")—Press to turn radio on. Press again to turn radio off.

B. Upper Knob—Rotate to control volume.

Press to recall station frequency when listening to the radio with the ignition on, or to display time of day with ignition off.

C. Balance Control (located behind upper knob)—Turn to adjust left/right speaker balance.

D. Lower Knob—Rotate to manually tune radio stations. Frequency will be displayed during tuning.

Press to alternately select AM or FM band.

E. Front/Rear Speaker Control (located behind lower knob)—Rotate to adjust the sound between the front and rear speakers.

F. Bass and Treble Controls—Slide treble control up to increase treble, or down

to decrease treble. Slide bass control up to increase bass, or down to decrease bass.

G. Pushbuttons—The radio has four pushbuttons you can use to easily select your favorite stations. You may select four AM and four FM stations for a total of eight selections.

To set pushbuttons:

1. Make sure the bandswitch (D) is on the band you want. Then, tune in the desired station.

2. Press SET button. (The Set indicator light on the frequency display will then light up.) Then press one of the four station pushbuttons (The station will return whenever it is pressed.)

J. & K. Scan & Seek—Use the Scan and Seek buttons for automatic station tuning.

J. Scan Button—Press to automatically sample each station being received. To stop Scan, press Scan button again.

Note: The Scan indicator on the frequency display will light during Scan operation.

K. Seek Button—Press to automatically locate and retain the next listenable station on the band:

To Set Time:

To set hour, press Set button (H). (The Set indicator light will then light up, and radio frequency will be displayed.)

Then, press Scan button, holding Scan button in until correct hour appears.

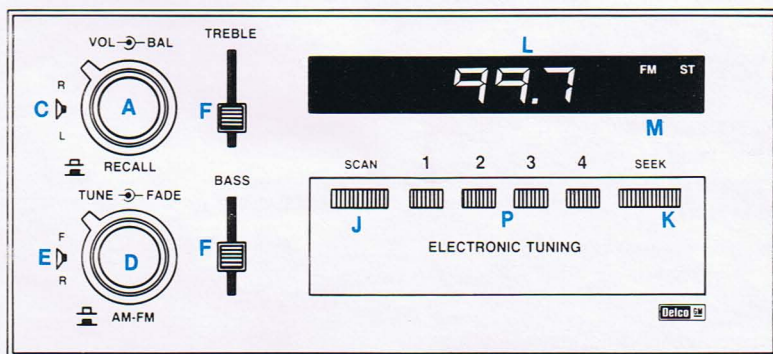

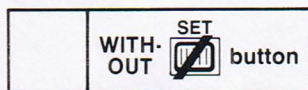

To set minutes, press Set button. (The Set indicator light will then light up and radio frequency will be displayed.)

Then, press Seek button, holding Seek button in until correct minute appears.

Note: After you press Set button, the radio frequency will be displayed. The time will be displayed when you press the Scan or Seek button.

L. Time or Station Frequency Display

M. FM Stereo Indicator—Lights up whenever an FM station is broadcasting in stereo.

Model without "set" button operates the same, except for the following controls—
On-Off: Rotate knob A to turn radio on and off, and to control volume.

To Set Time:

Gently pull and hold scan button (J) until correct hour appears.

Gently pull and hold seek button (K) until correct minute appears.

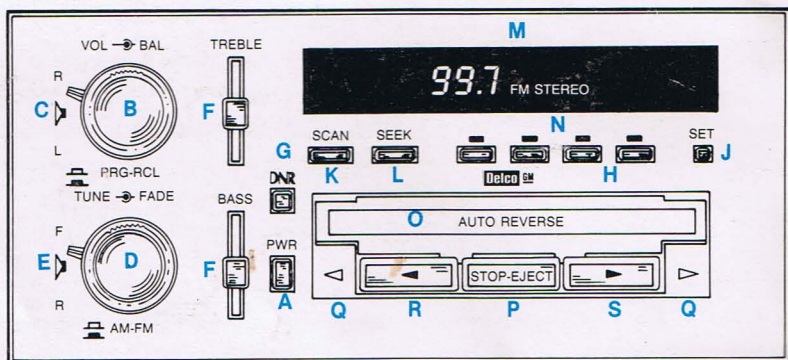

To Set Pushbuttons (P):

1. Tune to the desired station.
2. Gently pull button 1, 2, 3 or 4 and release.

You may select four AM and four FM stations for a total of eight favorite stations.

ETR AM/FM Stereo/SEEK & SCAN and Auto-Reverse Cassette with Clock *

WITH  button

To Operate the Radio:

A. Power Button ("Pwr")—Press to turn radio on. Press again to turn radio off.

B. Upper Knob—Rotate to control volume.

Press to recall station frequency when listening to the radio with the ignition on, or to display time-of-day with ignition off.

Press to select other side of tape when cassette is playing.

C. Balance Control (located behind upper knob)—Turn to adjust left/right speaker balance.

D. Lower Knob—Rotate to manually tune radio stations. Frequency will be displayed during tuning.

Press knob to alternately select AM or FM band.

E. Front/Rear Speaker Control (located behind lower knob)—Rotate control to adjust the sound between the front and rear speakers.

F. Bass and Treble Controls—Slide treble control up to increase treble, or down to decrease treble. Slide bass control up to increase bass, or down to decrease bass.

G. DNR™ Button—Press (Dynamic Noise Reduction) button to reduce high frequency hiss on AM, FM, FM stereo and tape.

Note: We recommend that the DNR button be pushed in at all times.

H. Pushbuttons—The radio has four buttons you can use to easily select your favorite stations. You may select four AM and four FM stations for a total of eight selections.

To set pushbuttons:

1. Make sure the bandswitch (D) is on the band you want. Then, tune in the desired station.

2. Press SET button. (The SET indicator light on the frequency display will then light up.) Then, press one of the four station pushbuttons. (The SET indicator light will then go out).

The radio will then tune to the selected station whenever you press the station button.

K. & L. Scan and Seek

Use the Scan and Seek buttons for automatic station tuning, and to set time.

- K. Scan Button**—Press to automatically sample each station being received. To stop Scan, press Scan button again.
Note: Scan indicator will light up during Scan operation.
- L. Seek Button**—Press to automatically locate and retain the next listenable station on the band.

***To Set Time:**

To set hour, press Set button (J). (The Set indicator light will then light up, and radio frequency will be displayed.)

Then, press Scan button, holding Scan button in until correct hour appears.

To set minutes, press Set button. (The Set indicator light will then light up and radio frequency will be displayed.)

Then, press Seek button, holding Seek button in until correct minute appears.

Note: After you press Set button, the radio frequency will be displayed when you press the Scan or Seek button.

- *M. Time or Station Frequency Display**
- N. FM Stereo Indicator**—Lights up whenever an FM station is broadcasting in stereo.

To Operate Tape Player:

- O. Tape Door**—Insert the cassette squarely through the tape door. This automatically switches the unit from radio to tape operation. Time-of-day will be displayed continuously.
- P. Stop-Eject Button**—Press stop-eject button to eject tape. Press stop-eject button also to stop fast forward or reverse motion of tape.
- Q. Tape Indicator Lights**—These show which direction the tape is moving. When the left indicator is lit, the top side of the tape is playing. When the right indicator is lit, the bottom side of the tape is playing.
- B. Program ("PRG")**—Press to select the other side of the cassette.
- R. & S. Forward/Reverse**
—These buttons advance or reverse tape motion. To fast forward, press the button next to the lighted indicator. To fast reverse, press the button next to the unlighted indicator. To stop the forward or reverse motion, press the stop-eject button.

When end-of-tape is reached in one direction, the unit will automatically play in the opposite direction, and play the other side of the tape.

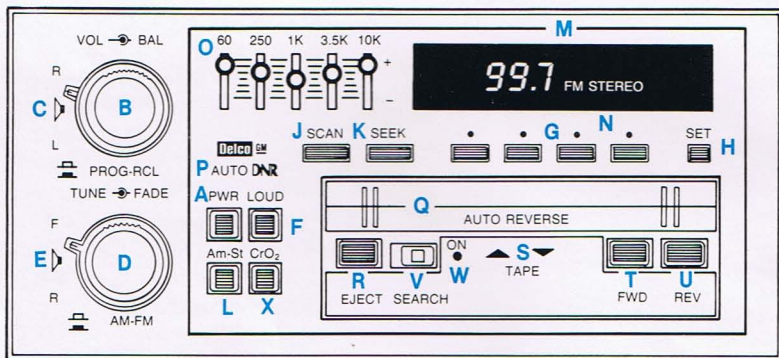

When radio is turned off, internal pressure on the tape is automatically released so no damage will occur when tape is left in.

*Note: Grand Prix and Bonneville do not have a clock in the radio.

Note: For best results, see page 2 for "Tape Player Care".

ETR AM Stereo†/FM Stereo/ SEEK & SCAN and Auto-Reverse Cassette with Music Search/Equalizer and Clock

WITH  button

To Operate the Radio:

A. Power Button ("Pwr")—Press to turn radio on. Press again to turn radio off.

B. Upper Knob—Rotate to control volume.

Press to recall station frequency when listening to the radio with the ignition on, or to display time-of-day with ignition off.

Press to select other side of tape when cassette is playing.

C. Balance Control (located behind upper knob)—Turn to adjust left/right speaker balance.

D. Lower Knob—Rotate to manually tune radio stations. Frequency will be displayed during tuning.

Press knob to alternately select AM or FM band.

E. Front/Rear Speaker Control (located behind lower knob)—Rotate control to adjust the sound between the front and rear speakers.

F. Loudness Button ("Loud")—Press to boost bass frequencies when the radio is playing at low volume.

G. Pushbuttons—The radio has four buttons you can use to easily select your favorite stations. You may select four AM and four FM stations for a total of eight selections.

To set favorite station buttons:

1. Make sure the band switch (D) is on the band you want. Then, tune in the desired station.
2. Press SET button. (The SET indicator light on the frequency display will then light up.) Then, press one of the four station buttons. (The SET indicator light will then go out).

The radio will then tune to the selected station whenever you press the station button.

J. & K. Scan and Seek

Use the Scan and Seek buttons for automatic station tuning, and to set time.

J. Scan Button—Press to automatically sample each station being received. To stop Scan, press Scan button again.

Note: The Scan indicator light on the frequency display will light up during Scan operation.

K. Seek Button—Press to automatically locate and retain the next listenable station on the band.

To Set Time:

To set hour, press Set Button (H).

Then, press Scan button and hold until correct hour appears.

To set minutes, press Set button. Then, press Seek button and hold until correct minutes appear.

Note: After you press Set button, the radio frequency will be displayed. The time will be displayed when you press the Scan or Seek button.

- L. **AM Stereo† ("AM-St")**—Press to receive AM Stereo. The "Stereo" indicator on the frequency display will be displayed when tuned to a station broadcasting in C-Quam® AM Stereo, provided it is being received with adequate signal strength in your locality. When the button is "out", all AM stations will be received in mono.

M. Time or Station Frequency Display

- N. **Stereo Indicator**—Lights up whenever a station is broadcasting in AM or FM stereo.

- O. **5-Band Graphic Equalizer**—Allows you to adjust bass, midrange, and treble to suit personal taste. (The 60 and 250 controls denote bass; 1K denotes midrange; and 3.5K and 10K denote treble.) Move control up to increase that frequency range, or down to decrease that frequency range.

A popular setting is shown (page 8). The 1K control is in center (detent) position with bass and treble increased.

- P. **Automatic DNR™ ("Auto DNR")**—This radio has Dynamic Noise Reduction that works automatically to reduce high frequency hiss that may occur on AM, FM, AM stereo, FM stereo, and tape.

To Operate Tape Player:

- Q. **Tape Door**—Insert the tape to activate the tape player.
- R. **Eject Button**—Press eject button to remove the tape from the player.
- S. **Tape Indicator Lights**—These show which direction the tape is moving. When the left

indicator light is lit, the top side of the tape is playing. When the right indicator light is lit, the bottom side of the tape is playing.

- B. **Program (PROG)**—Press to select other side of tape.
- T. **Forward Button ("Fwd")**—Press this button to fast forward the tape. To stop forward movement, press the reverse button (U) or the eject button (R) to eject the tape.
- U. **Reverse Button ("Rev")**—Press this button to fast reverse the tape. To stop reverse movement, press the forward button (T) or the eject button (R) to eject the tape.
- V. **Search Control**—To listen to the next selection, slide the Search control to the right and then press the forward button. The tape will advance to the next selection and begin playing.

To listen to the present selection again, slide the Search control to the right and then press the reverse button. The tape will reverse to the beginning of the present selection.

There must be at least **three blank seconds** between selections for the search function to work properly.

- W. **Search Indicator Light**—When the Search function (V) is activated, the "on" light will be lit.
- X. **Chromium Dioxide Tape Button ("CrO₂")**—Allows equalization for metal or chromium tapes. To select 70 Msec equalization for chrome and metal tapes push CrO₂ button "in". To select 120 Msec equalization for iron tapes, leave the CrO₂ button in an "out" position.

When end-of-tape is reached in one direction, the unit will automatically play in the opposite direction, and play the other side of the tape.

When ignition is turned off, the tape is automatically ejected.

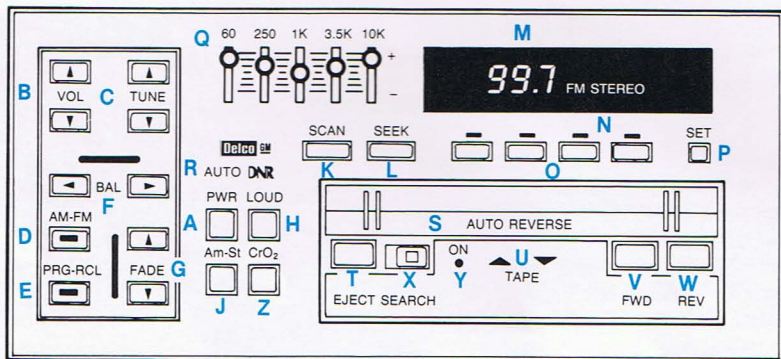

Note: For best results, see page 2 for "Tape Player Care".

†This product receives in stereo, Harris and Motorola C-QUAM® AM stereo transmissions.

DNR™ is a trademark of National Semiconductor Corporation.

ETR "Touch-Control" AM Stereo†/FM Stereo /SEEK & SCAN and Auto-Reverse Cassette with Music Search/Equalizer and Clock

WITH  button

To Operate the Radio:

A. Power Button ("Pwr")—Press to turn radio on. Press again to turn radio off.

B. Volume Buttons ("Vol")—To increase volume, press and hold Vol button with the arrow pointing up (▲). To decrease volume, press and hold Vol button with arrow pointing down (▼).

The radio returns to a pre-programmed volume level when the radio or ignition is turned on. This programmed volume can also be returned to by pressing and holding both Vol buttons at the same time.

C. Tune Buttons—To manually tune up the frequency band, press and hold the Tune button with the arrow pointing up (▲). To manually tune down the frequency band, press and hold the Tune button with the arrow pointing down (▼). When the highest frequency is reached, the display will continue tuning, starting from the lowest frequency. The opposite is true when the lowest frequency is reached.

D. AM-FM Bandswitch Button ("AM-FM")—Press to alternately select AM or FM band.

E. Program-Recall Button ("PRG-RCL")—Press to recall station frequency when listening to the radio with the ignition on, or to display time-of-day with ignition off. Press to select the other side of the tape when the cassette is playing.

F. Balance Buttons ("Bal")—Adjusts the left/right speaker balance.

To adjust sound to the left, press and hold Bal button pointing to the left (◀).

To adjust sound to the right, press and hold Bal button pointing to the right (▶).

To return balance to its center position, press and hold both Bal buttons at the same time.

Note: Above the balance buttons is a light indicating the balance level.

G. Fade Buttons—Adjusts sound to the front and rear of the car.

To adjust sound towards the front of the car, press and hold the Fade button pointing up (▲).

To adjust sound towards the rear of the car, press and hold the Fade button pointing down (▼).

To return the fader to its center position, press and hold both Fade buttons at the same time.

Note: To the left of the fade buttons is a light indicating the fade level.

H. Loudness Button ("Loud")—Press button "in" to boost bass frequencies when the radio is playing at low volume.

J. AM Stereo Button ("AM-St")—Press button "in" to receive AM stereo. The "stereo indicator light (N) will be displayed when tuned to a station broadcasting in C-Quam® AM stereo, provided it is being received with adequate signal strength in your locality.

When the AM-St button is out, all AM stations will be received in mono.

K. & L. Scan and Seek

Use the Scan and Seek buttons for automatic station tuning, and to set time.

K. Scan Button—Press to automatically sample each station being received. To stop Scan, press Scan button again.

Note: The Scan indicator light on the frequency display will be lit during the Scan operation.

L. Seek Button—Press to automatically locate and retain the next listenable station on the band.

To Set Time:

To set the correct hour, press Set Button (P).

Then, press Scan button and hold until correct hour appears.

To set the correct minutes, press Set button.

Then, press Seek button and hold until correct minutes appear.

Note: After you press Set button, the radio frequency will be displayed. The time will be displayed when you press the Scan or Seek buttons.

M. Time or Station Frequency Display

N. Stereo Indicator—Lights up whenever an AM or FM station is broadcasting in stereo.

O. Pushbuttons—The radio has four buttons you can use to easily select your favorite stations. You may select four AM and four FM stations for a total of eight selections. To set favorite station buttons:

1. Make sure the bandswitch (D) is on the band you want. Then, tune in the desired station.

2. Press SET Button. (The SET indicator on the frequency display will then light up.)

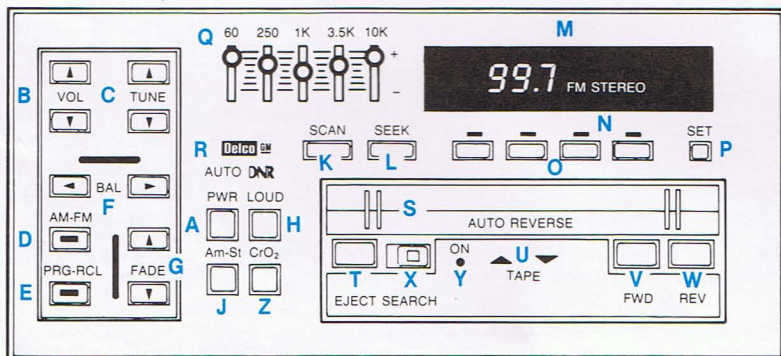

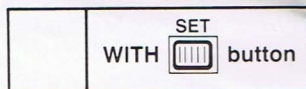

Then, press one of the four station buttons. (The SET indicator will then go out.) The radio will then tune to the selected station whenever you press the station button.

Q. 5-Band Graphic Equalizer—Allows you to adjust bass, midrange, and treble to suit personal taste. (The 60 and 250 controls denote bass; 1K denotes midrange; and 3.5K and 10K denote treble.) Move control up to increase that frequency range, or down to decrease that frequency range.

A popular setting is shown (page 10). The 1K control is in center (detent) position with bass and treble increased.

R. Automatic DNR™ (Auto DNR)—This radio has Dynamic Noise Reduction that works automatically to reduce high frequency hiss that may occur on AM, FM, AM stereo, FM stereo, and tape.

Turn the page for instructions to operate tape player.

To Operate Tape Player:

- S. Tape Door**—Insert the tape to activate the tape player.
- T. Eject Button**—Press eject button to remove the tape from the player.
- U. Tape Indicator Lights**—These show which direction the tape is moving. When the left indicator light is lit, the top side of the tape is playing. When the right indicator light is lit, the bottom side of the tape is playing.
- E. Program Button (PRG-RCL)**—Press to select other side of tape.
- V. Forward Button ("Fwd")**—Press this button to fast forward the tape. To stop forward movement, press the reverse button (W) or the eject button (T) to eject the tape.
- W. Reverse Button ("Rev")**—Press this button to fast reverse the tape. To stop reverse movement, press the forward button (V) or the eject button (T) to eject the tape.
- X. Search Button**—To listen to the next selection, slide the Search button to the right and then press the Fwd button. The tape will advance to the next selection and begin playing.

To listen to the present selection again, slide the Search button to the right and then press the Rev button. The tape will reverse to the beginning of the present selection. There must be at least **three blank seconds** between selections for the search function to work properly.

- Y. Search Indicator Light**—When the Search function (X) is activated, the "on" light will be lit.
- Z. Chromium Dioxide Tape Button ("CrO₂")**—Allows equalization for metal or chromium tapes. To select 70 Msec equalization for chrome and metal tapes push CrO₂ button "in". To select 120 Msec equalization for iron tapes leave the CrO₂ button in an "out" position.

When end-of-tape is reached in one direction, the unit will automatically play in the opposite direction, and play the other side of the tape.

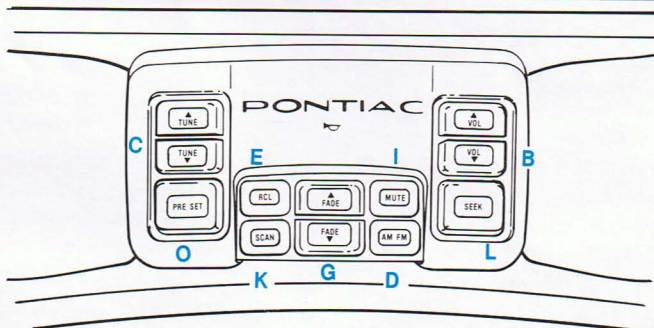

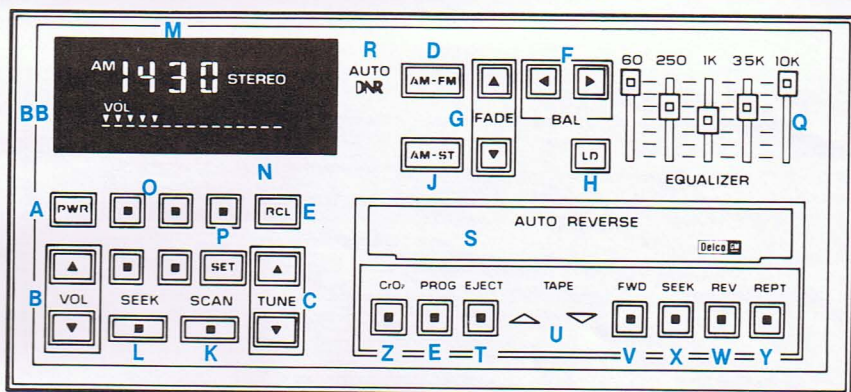

When ignition is turned off, the tape is automatically ejected.

Note: For best results, see page 2 for "Tape Player Care".

Delco GM

ADVANCED ETR "Touch-Control" AM Stereo†/FM Stereo/ SEEK & SCAN and Auto-Reverse Cassette with Music Search/Equalizer and Clock

WITH  button

To operate the radio:

The operation of this radio is identical to the ETR "touch control" radio described on pages 10, 11, and 12 except for the following differences.

- BB. Graphic Display**—This display graphically shows the status of the volume, speaker fade and speaker balance, depending on which is being adjusted.
- I. Mute (steering wheel control)**—Press this button to deaden the sound; press again to reactivate the sound.
- O. Pushbuttons-Preset**—This radio has five buttons for setting favorite stations. The Pre-set button on the steering wheel will advance through the stations one at a time.

To operate tape player:

The operation of the tape player is identical to the ETR "touch control" radio described on pages 10, 11 and 12 except for the following.

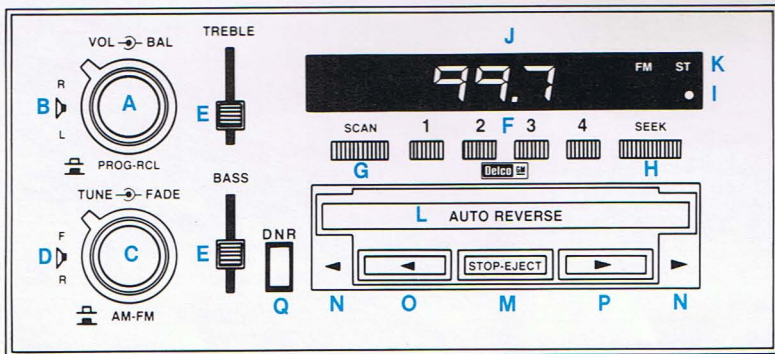

- X. Seek**—To search for the next selection, press the Seek button. The tape will advance to the next selection and begin playing.
- Y. Repeat ("REPT")**—To listen to the present selection again, press the repeat button.
- V. Fast Forward ("FWD")**—press to activate; press "PROG" to cancel.
- W. Fast Reverse ("REV")**—press to activate; press "PROG" to cancel.

When radio is turned off, internal pressure is automatically released so tape may be left in.

†This product receives in stereo, Harris and Motorola C-QUAM® AM stereo transmissions.

ETR AM/FM Stereo/SEEK & SCAN and Auto-Reverse Cassette with Clock

WITHOUT  button

To Operate the Radio:

- A. Upper Knob**—Rotate to turn radio on or off, and to control volume.

Press to recall station frequency when listening to the radio with the ignition on, or to display time of day with ignition off.

- B. Balance Control** (located behind upper knob)—Turn to adjust left/right speaker balance.

- C. Lower Knob**—Rotate to manually tune radio stations. Frequency will be displayed during tuning.

Press to alternately select AM or FM band.

- D. Front/Rear Speaker Control** (located behind lower knob)—Rotate to adjust the sound between the front and rear speakers.

- E. Bass and Treble Controls**—Slide treble control up to increase treble, or down to decrease treble. Slide bass control up to increase bass, or down to decrease bass.

- F. Pushbuttons**—The radio has four pushbuttons you can use to select your favorite stations. You may select four AM and four FM stations for a total of eight selections.

To set pushbuttons:

1. Make sure the bandswitch (C) is on the band you want. Then, tune in the desired station.
2. Gently pull button and release. The radio will then tune to the selected station whenever you push the station button.

G. & H. Scan & Seek

Use the Scan and Seek buttons for automatic station tuning, and to set time.

- G. Scan Button**—Press to automatically sample each station being received. To stop Scan, press Scan button again.
- I. Scan Indicator**—Lights up during Scan operation.
- H. Seek Button**—Press to automatically locate and retain the next listenable station on the band.

To Set Time:

Gently pull and hold Scan button (G) until correct hour appears.

Gently pull and hold Seek button (H) until correct minute appears.

J. Time or Station Frequency Display

- K. FM Stereo Indicator**—Lights up whenever an FM station is broadcasting in stereo.

To Operate the Cassette:

- L. Tape Door**—Insert the cassette squarely through the tape door. This automatically switches the unit from radio to tape operation.

- M. Stop-Eject button**—Press stop-eject button to eject tape. Press to also stop fast forward or reverse motion of tape.

- N. Tape Indicator Lights**—Show which direction the tape is moving. When the left indicator is lit, the top side of the tape is playing. When the right indicator is lit, the bottom side of the tape is playing.

- A. Program ("Prog")**—Press to select the other side of the cassette.

O. & P. Forward/Reverse

—These buttons advance or reverse tape motion. To fast forward, press the button next to the lighted indicator. To fast reverse, press the button next to the unlighted indicator.

To stop the forward or reverse motion, press the stop-eject button (M).

- Q. DNR—Push DNR™** (Dynamic Noise Reduction) "in" to reduce high frequency hiss on AM, FM, FM Stereo, and tape.

Tape Notes:

When end-of-tape is reached in one direction, the unit will automatically play in the opposite direction, and play the other side of the tape.

When ignition is turned off, internal pressure on the tape is automatically released so no damage will occur when tape is left in.

Note: For best results, see page 2 for "Tape Player Care".

DNR™ is a Trademark of National Semiconductor Corporation

FM Stereo Station Directory

Following is a listing of the rapidly-expanding number of FM radio stations broadcasting in stereo in the United States, and bordering areas of Canada and Mexico. To locate your favorite sounds simply determine the Program Format of your choice at the right and locate the corresponding code within your geographic location. The format Code letter is shown to the left of the station's frequency.

Program Format Codes:

- b* Beautiful/easy listening music
- c* Classical/"Fine Arts"
- e* Ethnic and foreign language programming
- g* Gospel and religious programming
- j* Jazz music
- k* Country and western music, including polkas
- l* Latin/Spanish music, usually with Spanish announcing

- m* Middle of the road music
- n* News
- p* Progressive/album rock
- r* Rock, including easy rock, top hits, rock oldies
- s* Soul/rhythm and blues music, "urban contemporary"
- t* Talk format

Up to two letters are used to indicate stations that may have two distinct program formats, as well as stations intermixing records of two types. Stations without a program format listing usually have a variety format.

*A noncommercial radio station, usually educational, "public," or religious.
